FIGHT ON COUNTY HIGH SCHOOL IN QUAY

KING MANUEL AND HIS GERMAN PRINCESS NOW VERY NEAR A BREAK

Paris, June 15.—Although the repeated rumors of divorce between the deposed King Manuel of Portugal and his German princess lack confirmation, friends of the family in Paris declare that their affairs have reached an acute stage. Manuel and his wife have never understood each other, and in spite of praiseworthy efforts on the part of both to arrive at an honorable arrangement of their differences, they have never succeeded in bridging the gulf which opened between them immediately after their marriage.

The marriage was an idyll. Queen Amelia looked upon the daughter of her old friend, the Prince of Hohenlohe-Sigmaringen as the ideal wife for her son, possessing all those qualities which were lacking in his character. The little princess had a will of her own and was not devoid of ambition. Might she not be the means of bringing Manuel back to the throne? Such a role, however, demanded, first of all, experience, and in this the princess was totally lacking, since she was young, almost irresponsible youth, irresolute but yet capable of sudden and unforeseen obstinacy. He on his side saw in her a narrow-minded authoritative young person, with ideals which appeared to him out-of-date and provincial—a passion for house-keeping and other domestic virtues which fell in neither with his tastes nor his requirements. Under these circumstances a quarrel was inevitable. Queen Amelia and the intimates of the two families are doing their best to smooth away the differences between the young couple, but they are not optimistic.

Plans are being laid for a Quay County fair in Taos this year. The county commissioners will be asked to appropriate \$500 toward the expense and if this is done the fair will be held.

Parts of County Making Bitter Opposition to School Proposed to Be Located in Taos; Election June 27.

Taos, N. M., June 14.—A bitter fight is being waged against the establishment of the Quay county high school, which it is proposed to locate in Taos, and on which an election will be held June 27th. Santa Feans, leading the opposition, the newspaper there making a bitter fight to ground that tax payers in distant parts of the county will not set the credit of the school. Other bewazers in equally distant points, from Taos, are taking a broader view of the question, but the result remains in doubt although it is believed that the vote of Taosans will be strong enough to carry the proposition.

A 250,000 Bushel Wheat Crop.

It is estimated that the wheat crop in the plains tributary to Taos will be not less than 250,000 bushels this year, or double any previous crop that has been harvested.

The crop is practically made, and barring destructive hail storms, is assured.

Plans are being laid for a Quay County fair in Taos this year. The county commissioners will be asked to appropriate \$500 toward the expense and if this is done the fair will be held.

UNIVERSITY BUYS A 240-ACRE TRACT ADJOINING CAMPUS

The regents of the University of New Mexico have closed a deal for the purchase of 240 acres adjoining the campus, at a cost of \$12,500 in cash, the tract was bought from a Denver company.

The tract will be held entire, President G. L. Brooks of the regents, said after the purchase, for use in the expansion of the university that is sure to come. It lies to the east and north of the present campus, which covers about 20 acres.

The Denver people bought the tract originally about 25 years ago for a cowplace. The regents have been trying to get possession of it for a year, at the three men, Ghost, Flanagan and Fairfield, who formed the original company, had died and it was necessary to deal with the three estates, which delayed proceedings.

The tract was secured for about half the price the previous owners paid.

NOTICE.

For the accommodation of those who have been sued or those who are not as yet paid their poll tax for 1914, and wishing to pay same, my office will be open Thursday evening from 7 to 9 o'clock, at No. 122, Third street.
